# Bug Report

Category	Label	Value
Bug ID	ID Number	TC – 039   Bug - 010
	Title	Duplicate contacts returned with same email in GET /contacts response
	Reporter	Aya AbuAli
	Submit date	2025-07-23
Bug overview	Summary	The GET /contacts endpoint returns multiple contact records with the same email, which violates uniqueness expectations for user records.
	URL	<a href="https://thinking-tester-contact-list.herokuapp.com/contacts">https://thinking-tester-contact-list.herokuapp.com/contacts</a>
	Screenshot	<a href="https://app.screencast.com/6y8vTXSoi9Qcl">https://app.screencast.com/6y8vTXSoi9Qcl</a> <a href="https://app.screencast.com/1eVZ38WW4A1Hx">https://app.screencast.com/1eVZ38WW4A1Hx</a>
Environment	Platform	Postman
	Operating System	Windows 10
	Browser	Chrome 138
Bug details	Preconditions	- Valid token available - At least one contact exists
	Steps to reproduce	1. Open Postman 2. Set valid token in Authorization header 3. Send GET request to /contacts 4. Parse response and check for duplicate emails
	Expected result	Each contact should have a unique email and ID — no duplicates should exist in the response
	Actual result	Multiple contact records returned with identical email addresses: ahmed@fake.com repeated across indexes 3 to 8
Bug tracking	Severity	low
	Assigned to	Backend/API Development Team
	Priority	Medium
Notes	Notes	Consider enforcing unique constraints on the email field in the database or filtering duplicates server-side in the response

# Bug Report

Category	Label	Value
Bug ID	ID Number	TC – 041   Bug - 011
	Title	GET /contacts/:id returns 400 Bad Request instead of 404 for non-existent contact ID
	Reporter	Aya AbuAli
	Submit date	2025-07-23
Bug overview	Summary	When a non-existent contact ID is requested, the API incorrectly returns 400 Bad Request instead of the expected 404 Not Found.
	URL	<a href="https://thinking-tester-contact-list.herokuapp.com/contacts/999999">https://thinking-tester-contact-list.herokuapp.com/contacts/999999</a>
	Screenshot	<a href="https://app.screencast.com/UQwOYGdM8JROb">https://app.screencast.com/UQwOYGdM8JROb</a>
Environment	Platform	Postmn
	Operating System	Windows 10
	Browser	Chrome 138
Bug details	Preconditions	<ul style="list-style-type: none"><li>- Valid token is available</li><li>- Use of a clearly non-existent contact ID (e.g., /contacts/999999)</li></ul>
	Steps to reproduce	<ol style="list-style-type: none"><li>1. Open Postman</li><li>2. Set Authorization header with valid token</li><li>3. Send GET request to /contacts/999999</li></ol>
	Expected result	API should return 404 Not Found indicating that the resource does not exist
	Actual result	API returns 400 Bad Request, which is misleading and incorrect for this scenario
Bug tracking	Severity	low
	Assigned to	Backend/API Development Team
	Priority	High
Notes	Notes	This misclassification could affect front-end handling and test automation relying on proper status codes

# Bug Report

Category	Label	Value
Bug ID	ID Number	TC – 089   Bug - 020
	Title	PATCH /contacts/:id returns 400 Bad Request instead of 404 Not Found for non-existent contact ID
	Reporter	Aya AbuAli
	Submit date	2025-07-23
Bug overview	Summary	When trying to PATCH a non-existent contact ID, the API incorrectly returns 400 Bad Request instead of the expected 404 Not Found.
	URL	<a href="https://thinking-tester-contact-list.herokuapp.com/contacts/999999">https://thinking-tester-contact-list.herokuapp.com/contacts/999999</a>
	Screenshot	<a href="https://app.screencast.com/ArJxqi5ydo7ju">https://app.screencast.com/ArJxqi5ydo7ju</a>
Environment	Platform	Postman
	Operating System	Windows 10
	Browser	Chrome 138
Bug details	Preconditions	- Valid token - Known non-existent contact ID (e.g., /contacts/999999)
	Steps to reproduce	1. Open Postman 2. Set Authorization header with valid token 3. Set method to PATCH 4. Use body { "phone": "123" } 5. Send request to /contacts/999999
	Expected result	Response should be 404 Not Found indicating the resource does not exist
	Actual result	API returns 400 Bad Request which is inaccurate and can mislead clients or automa tests
Bug tracking	Severity	low
	Assigned to	Backend/API Development Team
	Priority	Medium
Notes	Notes	API should differentiate between malformed requests (400) and non-existent resources (404)

Bug details	Preconditions	- Valid token - Existing contact ID
	Steps to reproduce	1. Open Postman 2. Set Authorization header with valid token 3. Set method to PATCH 4. Use body { "street1": "!@#\$%^&*()" } 5. Send request to /contacts/:id
	Expected result	API should return 400 Bad Request or a validation error when special characters are used in street1
	Actual result	API returns 200 OK and accepts the input with special characters
Bug tracking	Severity	low
	Assigned to	Backend/API Validation Team
	Priority	Low
Notes	Notes	Consider applying a regex pattern or character whitelist on address fields to prevent malformed or invalid data.

# Bug Report

Category	Label	Value
Bug ID	ID Number	TC – 157   Bug – 034
	Title	Login API Returns 401 Unauthorized Instead of 400 for Wrong/Old Password
	Reporter	Lina Shaqoura
	Submit date	23 - 07 - 2025
Bug overview	Summary	While testing the Login API using a valid email but an incorrect or outdated password, the API returns a <b>401 Unauthorized</b> response instead of the expected <b>400 Bad Request</b> . The API is incorrectly categorizing the error as an authorization failure rather than a bad input
	URL	<a href="https://thinking-tester-contact-list.herokuapp.com/users/login">https://thinking-tester-contact-list.herokuapp.com/users/login</a>
	Screenshot	<a href="https://app.screencast.com/0QO3zHAWR6g9q">https://app.screencast.com/0QO3zHAWR6g9q</a>
Environment	Platform	Laptop
	Operating System	Windows 11
	Browser	Google Chrome, Version 137.0.7151.56 (Official Build) (64-bit)
Bug details	Preconditions	The user is registered in the Contact List App, Postman is configured for API testing, and a valid email address with an invalid or old password is prepared
	Steps to reproduce	<ol style="list-style-type: none"><li>1. Open the Contact List App.</li><li>2. Launch Postman and configure the API environment.</li><li>3. Prepare a POST request to /api/login with the following payload: {   "email": "linashaqoura2002@gmail.com",   "password": "wrong password" }</li><li>4. Send the request.</li></ol>
	Expected result	API should return 400 bad request with JSON error message { "error": "Invalid email or password." }
	Actual result	The API returns 401 Unauthorized, which indicates an authorization issue instead of validation error (400).
Bug tracking	Severity	Critical
	Assigned to	Developer Team
	Priority	High
Notes	Notes	-

	Title	Login API Returns 401 Unauthorized Instead of 400 Bad Request for Invalid Email Format
	Reporter	Lina Shaqoura
	Submit date	23 - 07 - 2025
Bug overview	Summary	While testing the Login API with an email address in an invalid format (newEmail.com) and a valid password, the API incorrectly returns 401 Unauthorized instead of the expected 400 Bad Request. This behavior suggests that the API is not validating the email format before processing authentication
	URL	<a href="https://thinking-tester-contact-list.herokuapp.com/users/login">https://thinking-tester-contact-list.herokuapp.com/users/login</a>
	Screenshot	<a href="https://app.screencast.com/S5eFBufbQiOhH">https://app.screencast.com/S5eFBufbQiOhH</a>
Environment	Platform	Laptop
	Operating System	Windows 11
	Browser	Google Chrome, Version 137.0.7151.56 (Official Build) (64-bit)
Bug details	Preconditions	The user is registered in the Contact List App, Postman is configured for API testing, and an invalid email format with a valid password is prepared for testing
	Steps to reproduce	<ol style="list-style-type: none"><li>1. Open the Contact List App.</li><li>2. Launch Postman and configure the API environment.</li><li>3. Prepare a POST request to /api/login with the following payload:<pre>{  "email": "newEmail.com",  "password": "lina20\$"} </pre></li><li>4. Send the request.</li></ol>
	Expected result	The API should return 400 Bad Request with a JSON response like: <pre>{ "error": "Invalid email format." } </pre>
	Actual result	The API returns 401 Unauthorized, which suggests the email format is not validated prior to authentication.
Bug tracking	Severity	High

# Bug Report

Category	Label	Value
Bug ID	ID Number	TC – 169   Bug - 037
	Title	Delete User API Returns 401 Unauthorized Instead of 404 Not Found for Non-Existing User ID
	Reporter	Lina Shaqoura
	Submit date	23 - 07 - 2025
Bug overview	Summary	When attempting to delete a non-existing user ID using a valid authentication token, the Delete User API incorrectly returns a 401 Unauthorized response instead of the expected 404 Not Found. This creates confusion as the request is authorized, but the resource (user ID) does not exist. The API fails to correctly distinguish between authentication and resource existence issues.
	URL	<a href="https://thinking-tester-contact-list.herokuapp.com/users/me">https://thinking-tester-contact-list.herokuapp.com/users/me</a>
	Screenshot	<a href="https://app.screencast.com/AK0ZygodHDzI9">https://app.screencast.com/AK0ZygodHDzI9</a>

# Bug Report

Category	Label	Value
Bug ID	ID Number	TC – 170   Bug - 038
	Title	Delete User API Returns 401 Unauthorized on Repeated Delete Instead of 404 Not Found
	Reporter	Lina Shaqoura
	Submit date	23 - 07 - 2025
Bug overview	Summary	While testing the Delete User API, when sending multiple DELETE requests for the same user ID, the API behaves incorrectly on the repeated request. The first delete request works correctly (returns 200 OK or 204 No Content), but any subsequent delete request returns 401 Unauthorized instead of the expected 404 Not Found (since the user no longer exists).
	URL	<a href="https://thinking-tester-contact-list.herokuapp.com/users/me">https://thinking-tester-contact-list.herokuapp.com/users/me</a>
	Screenshot	<a href="https://app.screencast.com/uWUNoxv6MOvtf">https://app.screencast.com/uWUNoxv6MOvtf</a>
Environment	Platform	Laptop
	Operating System	Windows 11
	Browser	Google Chrome, Version 137.0.7151.56 (Official Build) (64-bit)
Bug details	Preconditions	The user is logged into the Contact List App, Postman is configured for API testing, a valid token is available, and a valid user ID exists for deletion.
	Steps to reproduce	<ol style="list-style-type: none"><li>1. Open the Contact List App.</li><li>2. Launch Postman and set up the API environment.</li><li>3. Prepare a DELETE request to /api/users/{validUserId}.</li><li>4. Add the valid authentication token in the Authorization header.</li><li>5. Send the DELETE request (second time).</li></ol>
	Expected result	Repeated delete attempts: API should return 404 Not Found with a message like: "User not Found."
	Actual result	Second delete request returns 401 Unauthorized, which is incorrect since the token is still valid; the proper response should indicate that the resource no longer exists (404).
